EXECUTIVE SUMMARY

- **\$65K annual opportunity** — additional value that could be captured from your ambient AI investment
- **72% value realization** — you're capturing 72 cents of every dollar of potential value
- **Utilization is your primary opportunity** — at 53% of benchmark, this is where focused effort may yield the greatest returns
- **\$194K potential over 3 years** — based on Abridge customer benchmarks

UNDERSTANDING VALUE REALIZATION

Ambient AI creates value through four dimensions: utilization (encounter coverage), efficiency (time savings), quality (wRVU lift), and satisfaction (provider adoption). Most organizations capture 30-60% of potential value because optimization requires all four dimensions working together.

\$65K

MATURITY STAGE

On the optimization spectrum

OUR FINDINGS

At 72% value realization, your organization is performing above average. You're capturing meaningful value from ambient AI. The remaining \$65K represents optimization opportunity that could compound your already-strong results.

Primary Opportunity

Your data shows Utilization as your biggest opportunity area (53% of benchmark), while Satisfaction is your relative strength (88%). Focused attention on Utilization could yield meaningful returns without disrupting what's already working.

What This Means

Each month represents approximately \$5K in additional potential value. Organizations at the "Optimized" stage sometimes see gradual changes over time — the key is intentional optimization rather than hoping for organic improvement.

DIMENSION	YOU	BENCHMARK	% OF BENCHMARK
Utilization	40%	75%	53%
Efficiency	3 min	4 min	75%
Quality (wRVU)	+3.5%	+5%	70%
Satisfaction	75%	85%	88%

How Your Score is Calculated

Your realization score is a simple average of how you perform across all four dimensions:

Utilization	53%
Efficiency	75%
Quality	70%
Satisfaction	88%
Average Score	72%

At 72% realization, you're in the "Optimized" stage. The gap between where you are and where you could be represents approximately \$65K annually.

EXHIBIT 1: YOUR PERFORMANCE ACROSS FOUR DIMENSIONS

Value realization depends on performance in four interconnected areas. Weakness in one dimension limits the others — gaps multiply, they don't just add up.

Satisfaction is a leading indicator. Dissatisfied providers use solutions less over time, creating a downward spiral. Happy providers become champions. Note accuracy, time actually saved, reliability, and whether it genuinely makes their day better.

EXHIBIT 2: HOW EACH OPPORTUNITY IS CALCULATED

Every number can be traced back to your inputs and transparent assumptions. No black boxes — you can verify each step.

UTILIZATION OPPORTUNITY			\$29K
40%	75%	35pp	
Your Rate	Benchmark	Gap	
1 Encounters at benchmark utilization $55,000 \times 75\% = 41,250 \text{ enc}$ 2 Gap encounters (not documented today) $41,250 - 22,000 = 19,250 \text{ enc}$ 3 Potential time savings if documented $19,250 \text{ enc} \times 4 \text{ min} \div 60 = 1,283 \text{ hours}$ 4 Value conversion (conservative 15% rate) $1,283 \text{ hrs} \times \\$150/\text{hr} \times 15\% = \\$29K$			
Annual utilization opportunity: \$29K			
EFFICIENCY OPPORTUNITY			\$21K
3 min	4 min	1.0 min	
Your Savings	Benchmark	Gap	
1 Additional time possible at benchmark efficiency $41,250 \text{ enc} \times 1.0 \text{ min} \div 60 = 688 \text{ hours}$ 2 Value conversion (20% rate — not all time converts) $688 \text{ hrs} \times \\$150/\text{hr} \times 20\% = \\$21K$			
Annual efficiency opportunity: \$21K			
QUALITY OPPORTUNITY (WRVU)			\$15K
+3.5%	+5%	+1.5%	
Your Lift	Benchmark	Gap	
1 Additional wRVU at benchmark quality $41,250 \text{ enc} \times 1.5 \text{ avg wRVU} \times 1.5\% = 928 \text{ wRVU}$ 2 Dollar value (50% attribution — conservative) $928 \text{ wRVU} \times \\$33/\text{wRVU} \times 50\% = \\$15K$			
Annual quality opportunity: \$15K			
TOTAL ANNUAL OPPORTUNITY			

Utilization (\$29K) + Efficiency (\$21K) + Quality (\$15K)

KEY TAKEAWAYS

- You're capturing **72%** of ambient AI's potential value
- The largest opportunity is in **Utilization** (53% of benchmark)
- Capturing this opportunity could mean **\$65K annually** / \$194K over 3 years
- Each month represents approximately **\$5K** in potential value
- All calculations use conservative assumptions — actual value may be higher

RECOMMENDED NEXT STEPS

Focus: Adoption & Habits

At 53% of benchmark, many encounters aren't capturing ambient AI value. Building consistent usage is the foundation for all other value.

QUICK WINS (THIS WEEK)

- Identify top 10 non-users and understand their barriers
- Review workflow friction points — login, devices, room setup
- Create specialty-specific quick-start guides

DEEPER DIVES (THIS MONTH)

- Analyze utilization by department to find patterns
- Consider peer champion programs in high-adoption areas
- Review training effectiveness and refresh content

METHODOLOGY & ASSUMPTIONS

YOUR INPUTS

- 50 providers
- 55,000 annual encounters
- 40% utilization
- 3 min time savings/encounter
- +3.5% wRVU lift
- 75% provider satisfaction

ABRIDGE BENCHMARKS

- 75% utilization
- 4 min saved per encounter
- +5% wRVU lift
- 85% satisfaction

VALUATION ASSUMPTIONS

- Provider time: \$150/hr
- Utilization conversion: 15%
- Efficiency conversion: 20%
- wRVU: \$33/wRVU (Medicare CF)

Benchmarks based on aggregate data from 200+ health system partners. Individual results vary based on specialty mix, operational factors, and implementation maturity. Conservative conversion rates ensure defensible projections.
