Brad Larmie

EXECUTIVE SUMMARY

- **\$69K annual opportunity** — additional value that could be captured from your ambient AI investment
- **75% value realization** — you're capturing 75 cents of every dollar of potential value
- **Efficiency is your primary opportunity** — at 63% of benchmark, this is where focused effort may yield the greatest returns
- **\$208K potential over 3 years** — based on Abridge customer benchmarks

UNDERSTANDING VALUE REALIZATION

Ambient AI creates value through four dimensions: utilization (encounter coverage), efficiency (time savings), quality (wRVU lift), and satisfaction (provider adoption). Most organizations capture 30-60% of potential value because optimization requires all four dimensions working together.

MATURITY STAGE

On the optimization spectrum

OUR FINDINGS

At 75% value realization, your organization is performing above average. You're capturing meaningful value from ambient AI. The remaining \$69K represents optimization opportunity that could compound your already-strong results.

Primary Opportunity

Your data shows Efficiency as your biggest opportunity area (63% of benchmark), while Quality is your relative strength (80%). Focused attention on Efficiency could yield meaningful returns without disrupting what's already working.

What This Means

Each month represents approximately \$6K in additional potential value. Organizations at the "Optimized" stage sometimes see gradual changes over time — the key is intentional optimization rather than hoping for organic improvement.

DIMENSION	YOU	BENCHMARK	% OF BENCHMARK
Utilization	59%	75%	79%
Efficiency	2.5 min	4 min	63%
Quality (wRVU)	+4%	+5%	80%
Satisfaction	65%	85%	76%

How Your Score is Calculated

Your realization score is a simple average of how you perform across all four dimensions:

Utilization	79%
Efficiency	63%
Quality	80%
Satisfaction	76%
Average Score	75%

At 75% realization, you're in the "Optimized" stage. The gap between where you are and where you could be represents approximately \$69K annually.

EXHIBIT 1: YOUR PERFORMANCE ACROSS FOUR DIMENSIONS

Value realization depends on performance in four interconnected areas. Weakness in one dimension limits the others — gaps multiply, they don't just add up.

U	UTILIZATION	79%
59%	75%	Developing
Your Rate	Benchmark	Status
Every encounter not using ambient AI is an encounter where providers still carry the full documentation burden. Low utilization means you're paying for capacity that isn't being used. Workflow integration, provider habits, technical friction, and whether the tool feels natural in clinical environments.		
E	EFFICIENCY	63%
2.5 min	4 min	Developing
Your Savings	Benchmark	Status
This is the core promise: giving time back to providers. Less time saved means the documentation burden persists, even when the tool is being used. Note quality out of the box, editing frequency, template optimization, and EHR integration smoothness. At 63% of benchmark, providers may be spending significant time editing notes after generation. This often indicates template issues, trust issues with the AI output, or workflow problems.		
Q	QUALITY (wRVU)	80%
+4%	+5%	Strong
Your Lift	Benchmark	Status
Better documentation leads to better coding, which leads to better reimbursement. Often the largest dollar opportunity because improvements compound across thousands of encounters. Clinical detail capture, coder feedback loops, and whether notes reflect the complexity of care actually delivered.		
S	SATISFACTION	76%
65%	85%	Developing
Your Score	Benchmark	Status

Satisfaction is a leading indicator. Dissatisfied providers use solutions less over time, creating a downward spiral. Happy providers become champions. Note accuracy, time actually saved, reliability, and whether it genuinely makes their day better.

EXHIBIT 2: HOW EACH OPPORTUNITY IS CALCULATED

Every number can be traced back to your inputs and transparent assumptions. No black boxes — you can verify each step.

UTILIZATION OPPORTUNITY			\$17K
59%	75%	16pp	
Your Rate	Benchmark	Gap	
1 Encounters at benchmark utilization $70,000 \times 75\% = 52,500 \text{ enc}$ 2 Gap encounters (not documented today) $52,500 - 41,300 = 11,200 \text{ enc}$ 3 Potential time savings if documented $11,200 \text{ enc} \times 4 \text{ min} \div 60 = 747 \text{ hours}$ 4 Value conversion (conservative 15% rate) $747 \text{ hrs} \times \\$150/\text{hr} \times 15\% = \\$17K$			
Annual utilization opportunity: \$17K			
EFFICIENCY OPPORTUNITY			\$39K
2.5 min	4 min	1.5 min	
Your Savings	Benchmark	Gap	
1 Additional time possible at benchmark efficiency $52,500 \text{ enc} \times 1.5 \text{ min} \div 60 = 1,313 \text{ hours}$ 2 Value conversion (20% rate — not all time converts) $1,313 \text{ hrs} \times \\$150/\text{hr} \times 20\% = \\$39K$			
Annual efficiency opportunity: \$39K			
QUALITY OPPORTUNITY (WRVU)			\$13K
+4%	+5%	+1.0%	
Your Lift	Benchmark	Gap	
1 Additional wRVU at benchmark quality $52,500 \text{ enc} \times 1.5 \text{ avg wRVU} \times 1.0\% = 788 \text{ wRVU}$ 2 Dollar value (50% attribution — conservative) $788 \text{ wRVU} \times \\$33/\text{wRVU} \times 50\% = \\$13K$			
Annual quality opportunity: \$13K			
TOTAL ANNUAL OPPORTUNITY

KEY TAKEAWAYS

- You're capturing **75%** of ambient AI's potential value
- The largest opportunity is in **Efficiency** (63% of benchmark)
- Capturing this opportunity could mean **\$69K annually** / \$208K over 3 years
- Each month represents approximately **\$6K** in potential value
- All calculations use conservative assumptions — actual value may be higher

RECOMMENDED NEXT STEPS

Focus: Time Savings

At 63% of benchmark, providers aren't experiencing the full time-saving promise. This often creates skepticism about value.

QUICK WINS (THIS WEEK)

- Survey providers on what they're editing most
- Review EHR integration for unnecessary steps
- Check template configurations against best practices

DEEPER DIVES (THIS MONTH)

- Analyze note editing patterns to identify issues
- Work with EHR team on reducing workflow friction
- Consider specialty-specific optimization sessions

METHODOLOGY & ASSUMPTIONS

YOUR INPUTS

- 60 providers
- 70,000 annual encounters
- 59% utilization
- 2.5 min time savings/encounter
- +4% wRVU lift
- 65% provider satisfaction

ABRIDGE BENCHMARKS

- 75% utilization
- 4 min saved per encounter
- +5% wRVU lift
- 85% satisfaction

VALUATION ASSUMPTIONS

- Provider time: \$150/hr
- Utilization conversion: 15%
- Efficiency conversion: 20%
- wRVU: \$33/wRVU (Medicare CF)

Benchmarks based on aggregate data from 200+ health system partners. Individual results vary based on specialty mix, operational factors, and implementation maturity. Conservative conversion rates ensure defensible projections.
