EXECUTIVE SUMMARY

- **\$119K annual opportunity** — additional value that could be captured from your ambient AI investment
- **57% value realization** — you're capturing 57 cents of every dollar of potential value
- **Quality is your primary opportunity** — at 40% of benchmark, this is where focused effort may yield the greatest returns
- **\$358K potential over 3 years** — based on Abridge customer benchmarks

CONTEXT: UNDERSTANDING VALUE REALIZATION

Ambient AI creates value through four dimensions: utilization (encounter coverage), efficiency (time savings), quality (wRVU lift), and satisfaction (provider adoption). Most organizations capture 30-60% of potential value because optimization requires all four dimensions working together. Small differences can add up to meaningful opportunity over time.

YOUR RESULTS AT A GLANCE

\$358K

3-Year Potential

Cumulative opportunity over three years

Developing

Stage

Where you are on the maturity spectrum

OUR FINDINGS

At 57% value realization, your organization has made meaningful progress. We're seeing this as a common inflection point — organizations at this stage have proven the solution works, and the opportunity now is determining how much of the remaining potential to pursue.

Primary Opportunity

Your data shows Quality as your biggest opportunity area (40% of benchmark), while Satisfaction is your relative strength (65%). This suggests focused attention on Quality could yield meaningful returns without disrupting what's already working.

What We're Seeing

Organizations at the "Developing" stage sometimes see gradual changes over time — small shifts in utilization, evolving satisfaction levels. The \$119K annual opportunity represents value that could be captured with focused optimization efforts.

DIMENSION	YOU	BENCHMARK	% OF BENCHMARK
Utilization	45%	75%	60%
Efficiency	2.5 min	4 min	63%
Quality (wRVU)	+2%	+5%	40%
Satisfaction	55%	85%	65%

THE VALUE REALIZATION SPECTRUM

Organizations move through four stages as they optimize ambient AI:

EARLY STAGE
Under 40%

DEVELOPING
40-60%

OPTIMIZED
60-80%

TRANSFORMED
80%+

YOU: 57%

At 57% realization, you're in the "Developing" stage. Based on what we're seeing, the opportunity between where you are and where you could be represents approximately \$119K annually.

EXHIBIT 1: YOUR PERFORMANCE ACROSS FOUR DIMENSIONS

Value realization depends on performance in four areas. Here's where you stand compared to Abridge benchmarks:

UTILIZATION

60%

You: 45%

Benchmark: 75%

Every encounter not using ambient AI is an encounter where providers still carry the full documentation burden. Low utilization means you're paying for a solution that isn't being used consistently. Key drivers include workflow integration, provider habits, technical friction (login issues, connectivity), and whether using the tool feels natural in clinical workflows. Improving utilization is often the fastest path to ROI.

EFFICIENCY

63%

You: 2.5 min

Benchmark: 4 min

Time savings per encounter is the core promise of ambient AI: giving time back to providers. Less time saved means the documentation burden persists, even when the tool is being used. Key drivers include note quality out of the box, how much providers edit generated notes, specialty-specific templates, and EHR integration smoothness. Providers spending significant time editing notes often indicates template issues or trust issues with AI output.

QUALITY (wRVU)

40%

You: +2%

Benchmark: +5%

Better documentation leads to better coding, which leads to better reimbursement — often the largest dollar opportunity in ambient AI. Small improvements in coding accuracy compound across thousands of encounters. Key drivers include how completely the AI captures clinical details, coder feedback loops, and whether documentation supports the complexity of care actually delivered. Review whether notes are capturing clinical complexity that supports accurate coding.

SATISFACTION

65%

You: 55%

Benchmark: 85%

Satisfaction is a leading indicator of long-term success. Dissatisfied providers use solutions less over time, creating a downward spiral, while happy providers become champions who drive adoption among peers. Key drivers include accuracy of generated notes, time actually saved, reliability, and whether the solution makes their day genuinely better. Understanding why providers are dissatisfied is critical — low satisfaction often predicts declining utilization.

AT A GLANCE: YOUR GAP TO BENCHMARK

Each bar shows your performance as a percentage of the Abridge benchmark (100% = fully optimized)

Utilization		60%
Efficiency		63%
Quality		40%
Satisfaction		65%

Needs Focus (<60%)
 Developing (60-80%)
 Strong (80%+)

Average: $(60\% + 63\% + 40\% + 65\%) \div 4 = 57\%$

Gaps multiply: 60% in one dimension limits all others

EXHIBIT 2: THE COST OF THE GAP OVER TIME

If the gap persists, unrealized value accumulates:

Each month represents approximately \$10K in additional potential value

EXHIBIT 3: HOW EACH OPPORTUNITY IS CALCULATED

Every number can be traced back to your inputs and transparent assumptions:

UTILIZATION OPPORTUNITY		\$34K
Your utilization: 45%	Benchmark: 75%	Difference: 30pp
Step 1: Encounters at benchmark: $76,000 \times 75\% = 57,000$		
Step 2: Encounters at your rate: $76,000 \times 45\% = 34,200$		
Step 3: Difference $\times$ time savings: $22,800 \text{ enc} \times 4 \text{ min} = 1,520 \text{ hours}$		
Step 4: Dollar value: $1,520 \text{ hrs} \times \$150/\text{hr} \times 15\% = \34K		
EFFICIENCY OPPORTUNITY		\$43K
Your efficiency: 2.5 min	Benchmark: 4 min	Difference: 1.5 min
Step 1: Additional hours possible: $57,000 \text{ enc} \times 1.5 \text{ min} \div 60 = 1,425 \text{ hours}$		
Step 2: Dollar value: $1,425 \text{ hrs} \times \$150/\text{hr} \times 20\% = \43K		
QUALITY OPPORTUNITY (WRVU)		\$42K
Your wRVU lift: +2%	Benchmark: +5%	Difference: 3%
Step 1: Additional wRVU: $57,000 \text{ enc} \times 1.5 \text{ avg wRVU} \times 3\% = 2,565 \text{ wRVU}$		
Step 2: Dollar value: $2,565 \text{ wRVU} \times \$33/\text{wRVU} \times 50\% = \42K		
TOTAL ANNUAL OPPORTUNITY		\$119K
Utilization (\$34K) + Efficiency (\$43K) + Quality (\$42K)		

THE OPPORTUNITY OVER TIME

Cumulative potential based on Abridge customer benchmarks

Total opportunity: **\$358K** over 3 years

KEY TAKEAWAYS

- You're capturing 57% of ambient AI's potential value
- The largest opportunity is in Quality (40% of benchmark)
- Capturing this opportunity could mean \$119K annually / \$358K over 3 years
- All calculations use conservative assumptions — actual value may be higher

RECOMMENDED NEXT STEPS

Focus: Documentation & Revenue

At 40% of benchmark, documentation improvements aren't translating to coding accuracy. This is often the largest dollar opportunity.

Quick Wins (This Week)

- Connect with coding team to get feedback on AI-generated notes
- Review HCC capture rates before vs. after ambient AI
- Identify specialties with largest documentation complexity gaps

Deeper Dives (This Month)

- Establish coder feedback loop to AI-generated documentation
- Analyze wRVU patterns by provider to identify coaching opportunities
- Review whether notes capture clinical complexity that supports billing

METHODOLOGY & ASSUMPTIONS

YOUR INPUTS

- 60 providers
- 76,000 annual encounters
- 45% utilization
- 2.5 min time savings
- +2% wRVU lift
- 55% satisfaction

ABRIDGE BENCHMARKS

- 75% utilization
- 4 min saved per encounter
- +5% wRVU lift
- 85% satisfaction

VALUATION ASSUMPTIONS

- Provider time: \$150/hr
- Utilization conversion: 15%
- Efficiency conversion: 20%
- wRVU: \$33 (Medicare CF)

Benchmarks based on aggregate data from 200+ health system partners. Individual results vary based on specialty mix and operational factors.
